

2018 Board Meeting: UNDP Programme on Climate Information for Resilient Development in Africa (CIRDA)

Dr. Bonizella Biagini CIRDA Manager UNDP GEF

Progress on Global Support

Empowered lives. Resilient nations.

Technical
Assistance to
National
Teams

- •23 Country Missions to 11 partner countries (cumulative).
- •5 Regional Workshops, 1 Hackathon. 1 Workshop on Sustainable Exit Strategies in 2017
- •1 Training on Data Processing and Consolidation held in 2017
- Procurement support to Uganda, Burkina Faso, Liberia, Sierra Leone, Malawi, the Gambia, Zambia, Tanzania
- •4 Long Term Agreements (LTAs) to enable acquisition of CI (met and hydro) technologies and services. 2 Hydrology LTAs enacted in 2017

Private Sector Engagement

- •Completing update on on a regional wide market study to identify the potential market for climate information services.
- •Continued outreach to key private sector and Last Mile Actors including mobile phone companies, technology providers. Including workshops on PPPs and 1 Technology Expo.
- •Academic publication on the potential for generating climate services to enhance SME in Africa in 2017

Knowledge
Management
and best
practices
sharing

- Facilitating dialogue among government and non governmental stakeholders
- •Communication platform to share achievements, best practices and lessons learned (among the 10 most visited sites for UNDP adaptation projects)
- •South South Cooperation to identify best practices- Guinea, Cambodia, Nigeria
- Presentations during key climate meetings (SBI, NAP, COPs, and 2017 AMCOMET Meeting)
- •1 large scale publication with lessons learned from the CIRDA Programme Implementation.
- Key donor outreach

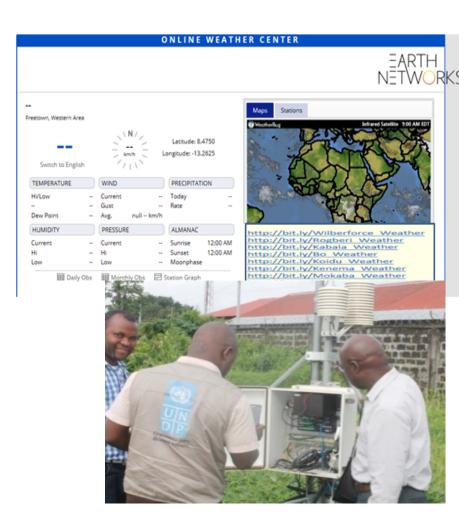

Resilient nations.

Status of implementation:

- The project has an 86% global delivery rate (77% 2017) and has been continually evaluated as Highly Satisfactory in its Implementation.
- The project was extended by UNDP to 2019 to provide support to new partners and countries that are still in implementation or upscale.
 - Guinea's SCI/EWS project will begin implementation by the end of 2018 and provide an extra USD 400,000 to the CIRDA Programme.
- Increasing interest by other countries and development agencies in learning CIRDA's experience (Cambodia, Madagascar, South Sudan).

Next steps:

- Packaging lessons learned and best practices into a Global KM Platform
- Supporting countries in ensuring a sustainable transition to national implementation
- Hydrology support and data processing

| Country | Status | Next Steps |
|--------------------------|---|--|
| Benin | Development of a multi function EWS Platform, expansion of Met and Hydro Network (43 stations), PPP study developed | GCF CI/EWS Upscale Exploring PPP with cellphone companies |
| Burkina Faso | National coverage of observation network (150 stations and 8 lightning sensors), incorporated a budget line for equipment maintenance (sustainability plan) | Completing EWS network (12 regions) |
| Ethiopia | Improved observation and forecast systems (2015 El Nino coverage), Capacity building has led to routine forecasts being produced for Ministry of Agriculture | Making us of data (processing and integrating other sources) |
| The Gambia | Strong digitization work and expansion of observation network (AWS and lightning sensor) | Installation of pilotsonde sytem and hydrogen generators |
| Liberia | A public web portal with CI has been developed. NHMS has rebuilt its infrastructure and forecasting capacity with LTA support. High level government support | Completing new offices, support in developing relevant products for cost recovery. Hydrology |
| Malawi | NHMS is currently running a national weather forecasting model. Invested in mobile last mile apps. Enhanced monitoring in Lake Malawi. Increased gov budget by 60%. | Packaging information, PPP partnerships |
| Sao Tome and Principe | National coverage of observation systems. Developed a new Weather Forecasting Unit and a multi platform EWS that is 24hr operational. | Procurement modelling software, exit strategy |
| Sierra Leone | Full deployment of weather stations, fully working EWS system, capacity for 10 day forecasting, PPP to deploy climate GIS applications for app development. | Annual survey of project, Strategic Plan, Hydrology |
| Tanzania | Investment in data assimilation and integration has improved forecasts particularly in hydrology. Used Hydro LTA to establish am excellent National Integrated Database for Climate and Hydrology . Approved SOPs | Exit strategy and cost recovery. Ensuring the CI system is fully operational |
| Uganda | Data sharing agreements, some cost recovery, CI products are using equipment from current project, focus on last mile | Conclude OM plans of equipment, and cost recovery arrangements |
| Zambia | Large network of station has increased forecasting capacity. Focus on agriculture and energy. | Hydrology 4 |

2018 Annual Work Plan

2018 Budget: USD 529,420

Mission Support

- In country missions to support individual country needs
- Hydrology support (use of RFP)

Sharing best practices

- Updated market study
- Fundraising for a Global KM Platform
- Blogs (ongoing) and google forum discussions
- Donor outreach

2018 Budget

Empowered lives. Resilient nations.

Total 2018 Budget: USD 529, 420

| EXPECTED OUTPUTS PLANNED ACTIVITIES PLANNED ACTIVITIES | | | | | |
|--|---|------------------------|---|--|--|
| And baseline, associated indicators and annual targets | List activity results and associated actions | 2018 | Budget Description | Targets 2018 | |
| Outcome 1: Enhanced capacity to monitor and forecast extreme weather, hydrology and climate change | | | | | |
| Output 1.1: | Activity Result 1.1:Availability of Procur | ement Services | | | |
| Key national stakeholders in each country implementing CI/EWS projects are trained on installation, as well as the operation and maintenance of weather, climate and hydrological monitoring and forecasting equipment (including telecommunications and data archiving facilities), ensuring their compatibility with other ongoing initiatives such as those financed by WMO, GFDRR and PPCR and others. Baseline: existing procurement support for 10 participant countries: 0% Indicator: Approved procurement contracts Annual Target: 2-3 contracts (or 20-30%) | Action 1.1.1: MOU with BoM/PSO to provide procurement and technical specificiations support for enhancing observation systems | \$ 43,520.00 | 71200 International Consultants | Establishment of at least 2 procurement plans of hydrological equipment. | |
| | Total Output 1.1 | \$ 43,520.00 | platform to promote the communication sharing | | |
| Output 1.2: | of best practices | ig communication | platior in to promote the communication sharing | | |
| Best practices, data and information are shared between countries to enhance country level capabilities to monitor and forecast weather, climate and hydrology, including recommendations and plans of where new equipment can be optimally deployed for regional coverage and scientific advice Baseline: 1 communication platforms (website and blog), 3 news letters Indicator: = communication platforms (blog, web site), = communication materials , = newsletters Annual Target: 1 communication platform (website and blog), 6 newsletters, 3 communication materials to share best practices | Activity 1.2.1:Develop communication materials to share best practices and strengthen existing communication channels | \$0 \$0 \$0 0 | 71200International Consultants 71600 Travel 74200- Audio visual and Printing Production Costs 71200 - translators/editors/designers | Packaging of national best practices (at least 3) | |
| | Total Output 1.2 | \$o | | | |
| Output 1.3; | Activity Result 1.3 | | | | |
| | | \$47,040 | 71200 International Consultants | | |
| Technical guidance and training delivered to | Activity 1.3.1 Missions to partner countries to provide on the ground expert training | \$20,000 | 71600 Travel | 1 | |
| each participating country on the selection and identification of cost-effective | | \$20,000 | | | |
| technologies, including the potential cost- benefits of operating and maintaining these | | \$166,000 | 61300 - Salary and post adjustment cost - IP staff | | |
| technologies. | Activity 1.3.2High level technical support on identifying appropriate alternative technologies, support | | 71200 International Consultants | 6 country partner | |
| Baseline: 2 national training missions 0 vetted procurement plans that include non traditional cost-effectve technologies | alternative technologies, support includes technical vetting and assistance of national procurement plans | | 71600 Travel | 6 country partner missions t | |
| | Activity 1.3.3 High level technical support on alternative methods for | | 71200 International Consultants | | |
| Indicator: = national training missions, = vetted procurement plans that include non traditional cost effective technologies | forecasting and monitoring climate and weather | | 71600 Travel | | |
| Annual Target: 9 national training missions, 3 procurement plans that included nos traditional cost effective technologies | Total Output 1.3 | \$233,040 | | | |
| Total Outcome 1 | | \$276,560.00 | | | |

2018 Budget

Empowered lives. Resilient nations.

| Resilient nations. | | | | | |
|---|---|--------------------|--|---|--|
| Outcome 2: Efficient and effective use of hydro-meteorological information for generating early warnings and supporting long-term development plans and adaptation to climate change | | | | | |
| Output 2.1: | Activity Result 2.1 | | | | |
| Best practices are shared between countries to enhance country-level capabilities to produce tailored products, warnings and communicate advisories/warnings, including | Action 2.1.1 Regional training workshop on application development to package weather and climate information | | 71600 - Travel | Packaging information | |
| advice on using scientifically robust information from other countries/international centers. Indicator: Number of Met Office staff trained Annual Target: 30 | | \$30,000 | 75700 Workshop Seminars and Trainings 72500 Supplies 71200 - International Consultants 74200 Audio Visual and printing production costs | on workshops, consolidating workshop materials and publications derived from them | |
| | | | | | |
| | Total Output 2.1 | \$30,000 | | | |
| Output 2.2 | Activity Result 2.2: Assesment of existi | ng national capaci | ities including digitization of past climate data | | |
| Effective communication and use of climate information and early warnings is supported through developing and testing the uptake of new products and visualization techniques, through multiple-media in collaboration with country-specific teams. | Action 2.2.1 M and E Analyisis | | 71200 - International Consultants | | |
| Indicator: # of studies Baseline: 0 Annual Target: 2 | Action 2.2.2 Enhancement of national capacities to digitizing existing climate data to facilitate forecasting and development of new products | | 71200 - International Consultants | 1 training on transfroming digitized material into products | |
| | Total Output 2.2 \$ 11,500.00 | | | | |
| Output 2.3: | Activity Result 2.3: Private sector strate | gy developed and | alternate sources of funding indetified | | |
| Country teams are supported to identify alternative revenue streams, donor funding and public-private partnerships to support the long-term sustainability of infrastructure and services. | Action 2.3.1 Training to PMs and IP | | 76100 - Travel 75700 Workshop Seminars and Trainings 74200 Audio Visual and printing production costs 72500 Supplies 71200 International Consultants | | |
| Baseline: Limited participation of the private sector in African LDCs | Action 2.3.2 Outreach to selected donor countries and development partners, | | 71600- Travel | | |
| | | \$165,430 | 61300 - Salary and post adjustment cost - IP staff | | |
| Indicator:# of partnerships developed | Action 2.3.3 Side events and outreach at high profile and partner event to promote the programme and its | | 71600 - Travel | | |
| Annual Target: 3 partnerships in CIRDA countries | objectives | | 75700 Workshop Seminars and Trainings 74200 Audio Visual and printing production costs | | |
| | Action 2.3.4 Market study of the potentatial value of climate and weather information and its capacity to create revenue to NHMS services | | 71200 International Consultants | Final Market Study presented | |
| | Action 2.3.5 Development of a private sector strategy with key recommendations and support to | | 71200- International Consultants | | |
| | partner countries Total Output 2.3 | \$165,430 | 71600- Travel | | |
| Total Outcome 2 | | \$206,930.00 | | | |
| | | | | | |

2018 Budget

| Programme Management | Salaries for project manager | \$9,930 | 61300 - Salary and post adjustment cost - IP staff | |
|----------------------|--------------------------------------|-------------|--|--|
| | Communications and audio visuals | \$1,000 | 72400 - Communication and Audio Visual Equipment | |
| | Rental cost of premises(HQ) | \$27,000 | 73100 - Rental and Maintenance - Premises | |
| | Cost recovery | \$8,000 | 73500 - Reimbursable support costs | |
| | Total project management costs (PMC) | \$45,930 | | |
| TOTAL 2018 BUDGET | | \$529,420.0 | 0 | |

 Funds will remain to continue the Programme unto 2019 (USD 128,676)

Topics for Approval

- Approval of the 2018 AWP and Budget
- Confirmation of the CIRDA Programme's No Cost Extension to Dec. 2019

Thank you
