The Gambia

- To continue building human resource capacity
- To construct new met building infrastructure (offices)
- Engage mobile phone companies to help in dissemination of climate information to the end-users (farmers & fishermen)
- Sensitization of policy makers (politicians)
- To engage insurance companies to include farmers in the event of drought, flooding or other climate natural hazards
- To forge MOU with all community radios to help in the dissemination of climate information
- To dialogue with the Government for possible revitalisation of the defunct Agricultural Development Bank
- To complete the process of implementation of Quality Management System
- To expand the market avenue for provision of climate information such as sport and tourism
- To build on the gains of the first Phase of the Project and invest in strengthening current systems to lead to a fully operational climate change early warning system
