people**

with enhanced access to
water

G7 Adaptation Accelerator Hub

Why AAH?

- Accelerate **implementation** of the Global Goal on Adaptation (GGA) by translating NAPs and NDCs into **investment-ready portfolios**
- Bridge the **adaptation finance gap** through innovative mechanisms and partnerships
- Create a pipeline of **bankable, scalable adaptation projects** aligned with national priorities

How it works

- **Tier 1:** Deep technical assistance in AAH partner countries (e.g., Ethiopia with Italy)
Tier 2: Knowledge exchange and learning across countries
G7–Country Partnerships: Italy–Ethiopia, France–Senegal, Japan–Cambodia, UK–Mauritius, etc
Cross-cutting support: Adaptation finance strategies, private-sector engagement, investment pipeline development, and MEL alignment with the GGA

Examples

- Supporting **Adaptation Finance Strategy Guidelines** and **Climate Investment Planning & Mobilization Framework (CIPMF)**
- Piloting **blended-finance instruments** (e.g., weather-index insurance, municipal climate funds, blue/green bonds)
- Leveraging **public-private partnerships** through the **Insurance and Risk Finance Facility (IRFF)** and PSE strategy
- Linking to **GGA progress tracking** and **Rome Process Financing Facility (AfDB)** for investment scaling

Catalyzing partnerships, innovation, and investment to deliver resilience at speed and scale
