

‘INTEGRATED COMMUNITY BASED MANGROVE & NATURAL RESOURCES CO-MANAGEMENT PLAN’ FOR TABONTEBIKE

Date: 13th June 2017

It was developed by the people of Tabontebike

**THE DEVELOPMENT OF THIS CBMMP WAS SUPPORTED BY TARATEITI URIAM (MFMRD-CBFM OFFICER),
MIRIAM BARAI (MFMRD-FA), GEORGE TAOABA (MELAD-ENVIRONMENT INSPECTOR) ao TARANIMAN RIKIAUA (MELAD- Environment Inspector)**

FUNDED BY KIRIBATI ADAPTATION PROGRAM

EXECUTIVE SUMMARY

The successful completion of this management plan has been made possible through the participation made by the village of Tabontebike, Abemama in June, 2017 and the consistent coordination by the Environment & Conservation Division from the Ministry of Environment, Lands and Agricultural Development (MELAD). However, the completion and endorsement of this Integrated Community-based Mangroves and Natural Resources Management plan was financially supported by the Office of the President (OB) through the Kiribati Adaptation Programme III (KAP III).

FOREWORD

I would like to express my sincere gratitude on behalf of my village members of Tabontebike, Abemama for the complete production of our ‘Integrated Community Based Management & Natural Resource co-management Plan’ (CBMMP). This is one of the important milestones our village has achieved in fulfilling our goals for protecting and conserving our land and marine resources. Environmental problems and issues that we continuously face are to be addressed through the effective implementation of this Management plan. No doubt, this plan would bring great benefit through our commitments in ensuring its successful implementation.

I would like to thank His Excellency and Secretary of the ‘Office of Te Beretitenti’ (OB) and all staff involved in managing and executing the Kiribati Adaptation Program III (KAP III) that has financed the work of the Environment and Conservation Division in facilitating the formulation and completion of this Management Plan.

My gratitude also goes to the Minister and Secretary of the Ministry of Environment, Lands and Agricultural Development (MELAD) and all staff of the Environment and Conservation Division (ECD) for their support and assistance in facilitating the completion of this Management Plan.

I would also like to acknowledge staff from other government sectors, not forgetting the Island Clerk for Abemama Island Council for their assistance and support. Last but not the least, my sincere gratitude goes to my village members for their time and great effort invested in the development and completion of the Management Plan for our beloved village, Tabontebike.

May the Kiribati traditional blessings of HEALTH, PEACE and PROSPERITY be upon us all.

Thank you and may you all be blessed

.....

Chairperson-Tabontebike, Abemama

AIMS & OBJECTIVES

1. Local constitution for protecting and conserving Mangroves is established and endorsed.
2. Support is given to the villagers for the implementation of the management plan for planting and protecting of mangroves as well as conserving both terrestrial and marine resources.
3. Strong cooperation between the people of Tabontebike to safeguard the health and integrity of the environment.
4. Sustaining of marine resources through the promotion of mangroves planting.
5. Establishment of the mangrove nursery area for Tabontebike village.
6. Establishment of enforcement committee for Tabontebike village.

VISION

1. In five years (5) time from now, Tabontebike will be one of the villages in Abemama where number of healthy mangroves can be discovered, a place where coastal erosion is not severe, clean, healthy marine resources and improved agricultural products. It will be also a village where there are different means could be availed from mangroves for earning income and most importantly, it will be a village that recognizes and enforces a local constitution as well as implementing the management plan for generating wealth to Tabontebike village.

INTRODUCTION

The village of Tabontebike in Abemama is very well known in Kiribati for substantial conservation and management works in protecting mangroves and especially its coastal and marine natural resources that are fundamental for the livelihood of the people of Kiribati as a whole. Efforts building on these crucial initiatives were undertaken through active collaboration between the people of Tabontebike Village and the office of the Environment and Conservation Division within the Ministry of Environment, Lands and Agricultural Development, whereby the legitimacy of these efforts was considered to become recognizable through the establishment of village local constitution and enforced in the Village to govern its significance effectively.

As such, the Environment and Conservation Division through funding support from the Kiribati Adaptation Programme II and III (KAP II and III), undertook initial engagements in mangroves planting and consider that this will also be made possible to support relevant activities leading up to the preparation, consultations and establishment of these village by laws, and provide the basis for conservation of mangroves and coastal and marine natural resources in the village of Tabontebike in the long run.

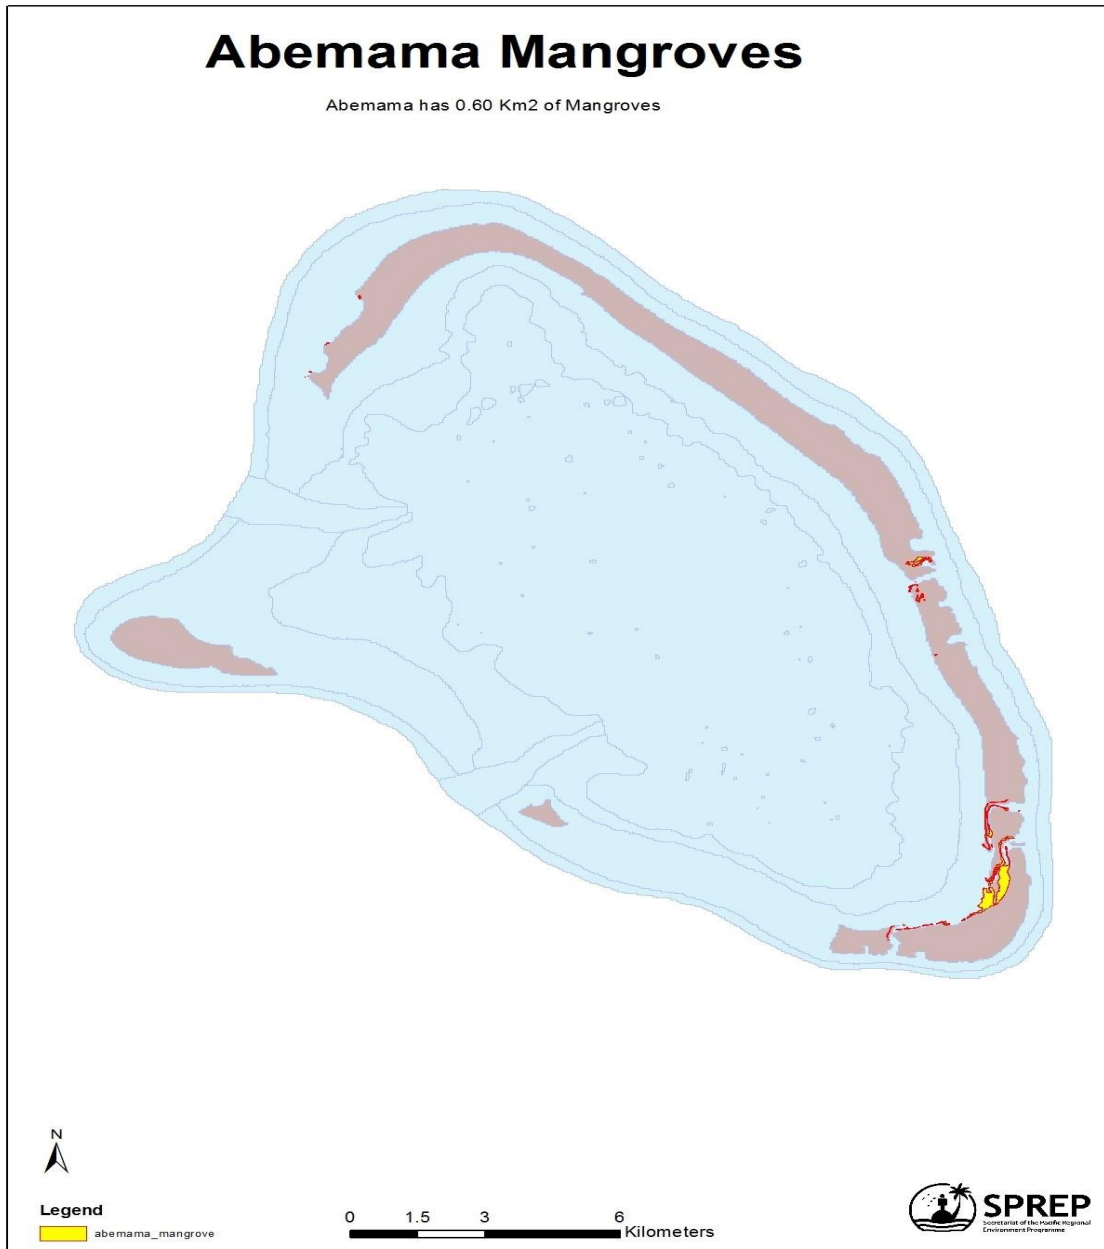

The local constitution and principles that are set herein this document belongs to the people of Tabontebike Village, and effective utilization and guidance to give true meaning to its purpose rests solely with the elders or Unimwane, all responsible chairmen and as well as the people of Tabontebike as a whole. As an obligation, outsiders (referring to as “people from other villages apart from Tabontebike” and “foreigners”) will be inclined to exercise the purpose for which these bylaws are established and thus, appreciate the sense of ownership in the efforts to finally pave way as an example for other islands in the Republic of Kiribati to be guided by as well.

THE USE AND IMPLEMENTATION OF THE MANAGEMENT PLAN

The use and implementation process of this management plan is restricted to Tabontebike boundary in Abemama. Tabontebike is recognize for protecting mangroves and marine resources listed in the local constitution which support this management plan. This management plan is also having a capacity in supporting and ease the load of Abemama Council in catering issues and worries which seemingly could affect the whole island, and Tabontebike. This management plan is also assisting and supporting the preparation of villagers to combat and minimize issues related to climate change

The implementation of the management plan is supported by Tabontebike local constitution, which was established by the whole village and the Ministry of Women, Youths and Social Affaris (MWYSA), after seeing it proper to have a local constitution, which could assist the village in establishing and fulfilling this management plan. This local constitution of Tabontebike will be recognized and included in any relevant ministries responsible for its implementation which will be done by the whole village, and with the assistance of AIC Clerk and MELAD ECD.

Figure 2: MAP OF MANGROVE COVERAGE ON ABEMAMA

The above map shows the mangrove coverage on Abemama. Mangrove demarcation was done in 2013 under KAPII by LMD and ECD. Because there is no recent mangrove demarcation take place on the island, it was difficult to see the changes in mangrove cover of either it increase or decrease.

MONITORING OF MANGROVES IN ABEMAMA (2013-2017)

The Mangrove plant can survive on land and at the sea, but in Kiribati, the mangrove plants are usually seen at the coastal area. Abemama is one of the Kiribati islands where two species of mangrove found on it, which are White mangrove and Red Mangrove. There are mangroves replantation activities conducted by various villages on the island (shown in the table below) through the support from the Environment and Conservation Division under the KAP II & KAP III project. The information on mangrove replanting activities in various areas on Abemama is fully emphasized in the table below. It is believed by Abemama islanders and the Environment and Conservation Division that most mangroves are survive closed to Tekatia's bridge. Also, there are few mangroves that are found survived at the coastal areas of different villages. The table below record the number of mangrove seedlings that had been planted mangroves by the local people and ECD staffs, including also mangrove planting record with ISME team (International Society of Mangrove Ecosystem).

Kiribati Adaptation Programme – KAP III (Year 2013 to 2017)
