

'Integrated
Community Based
Mangrove & Natural
Resources Co-
Management Plan'
for Baretoa

EXECUTIVE SUMMARY

The successful compilation and completion of this document was a combined effort made by the people of Baretoa Village in Abemama, with the support from the Government of the Republic of Kiribati through the Ministry of Environment, Lands and Agricultural Development (MELAD) in June 2017. All undertakings and lead up activities including publishment of this document was made possible through the funding support of the Kiribati Adaptation Project or Programme III (KAP III) that currently sits within the Office of Te Beretitenti (OB).

FOREWORD

I would like to express my sincere gratitude on behalf of my village members of Baretoa, Abemama for the complete production of our ‘Integrated Community Based Management & Natural Resource co-management Plan’ (CBMMP). This is one of the important milestones our village has achieved in fulfilling our goals for protecting and conserving our land and marine resources. Environmental problems and issues that we continuously face are to be addressed through the effective implementation of this Management plan. No doubt, this plan would bring great benefit through our commitments in ensuring its successful implementation.

I would like to thank His Excellency and Secretary of the ‘Office of Te Beretitenti’ (OB) and all staff involved in managing and executing the Kiribati Adaptation Program III (KAP III) that has financed the work of the Environment and Conservation Division in facilitating the formulation and completion of this Management Plan.

My gratitude also goes to the Minister and Secretary of the Ministry of Environment, Lands and Agricultural Development (MELAD) and all staff of the Environment and Conservation Division (ECD) for their support and assistance in facilitating the completion of this Management Plan.

I would also like to acknowledge staff from other government sectors, not forgetting the Island Clerk for Abemama Island Council for their assistance and support. Last but not the least, my sincere gratitude goes to my village members for their time and great effort invested in the development and completion of the Management Plan for our beloved village, Baretoa.

May the Kiribati traditional blessings of HEALTH, PEACE and PROSPERITY be upon us all.

Thank you and may you all be blessed

.....

Chairperson-Baretoa, Abemama

AIMS & OBJECTIVES

1. Local constitution for protecting and conserving Mangroves is established and endorsed.
2. Supporting villagers to plant and help to promote mangrove conservation activities
3. Strong cooperation between the people of Baretoa to safeguard the health and integrity of the environment.
4. Sustaining of marine resources through the promotion of mangroves planting
5. Establishment of the mangrove nursery area for Baretoa village.
6. Establishment of enforcement committee for Baretoa village.

VISIONS

1. Baretoa village will become an island which dominated by green vegetation
2. Healthy mangroves to be found in the whole village
3. The village of Baretoa to continue support activities regarding mangrove planting
4. Baretoa village must support the conservation and monitoring of all mangrove species exists on the island and within the village of Baretoa
5. Baretoa will become a village that often support management plans and local constitutions that are already been endorsed and are related to the conservation of terrestrial and marine resources.
6. The village of Baretoa will encourage its people to plant different kind of crops and depends on it for living for their good health.
7. The Natural resources of Baretoa village will stay exist for the present and future generation.

INTRODUCTION

The village of Baretoa in Abemama is very well known in Kiribati for substantial conservation and management works in protecting mangroves and especially its coastal and marine natural resources that are fundamental for the livelihood of the people of Kiribati as a whole. Efforts building on these crucial initiatives were undertaken through active collaboration between the people of Baretoa Village and the office of the Environment and Conservation Division within the Ministry of Environment, Lands and Agricultural Development, whereby the legitimacy of these efforts was considered to become recognizable through the establishment of village by-laws and enforced in the Village to govern its significance effectively.

As such, the Environment and Conservation Division through funding support from the Kiribati Adaptation Programme II and III (KAP II and III), undertook initial engagements in mangroves planting and consider that this will also be made possible to support relevant activities leading up to the preparation, consultations and establishment of these village by laws, and provide the basis for conservation of mangroves and coastal and marine natural resources in the village of Baretoa in the long run.

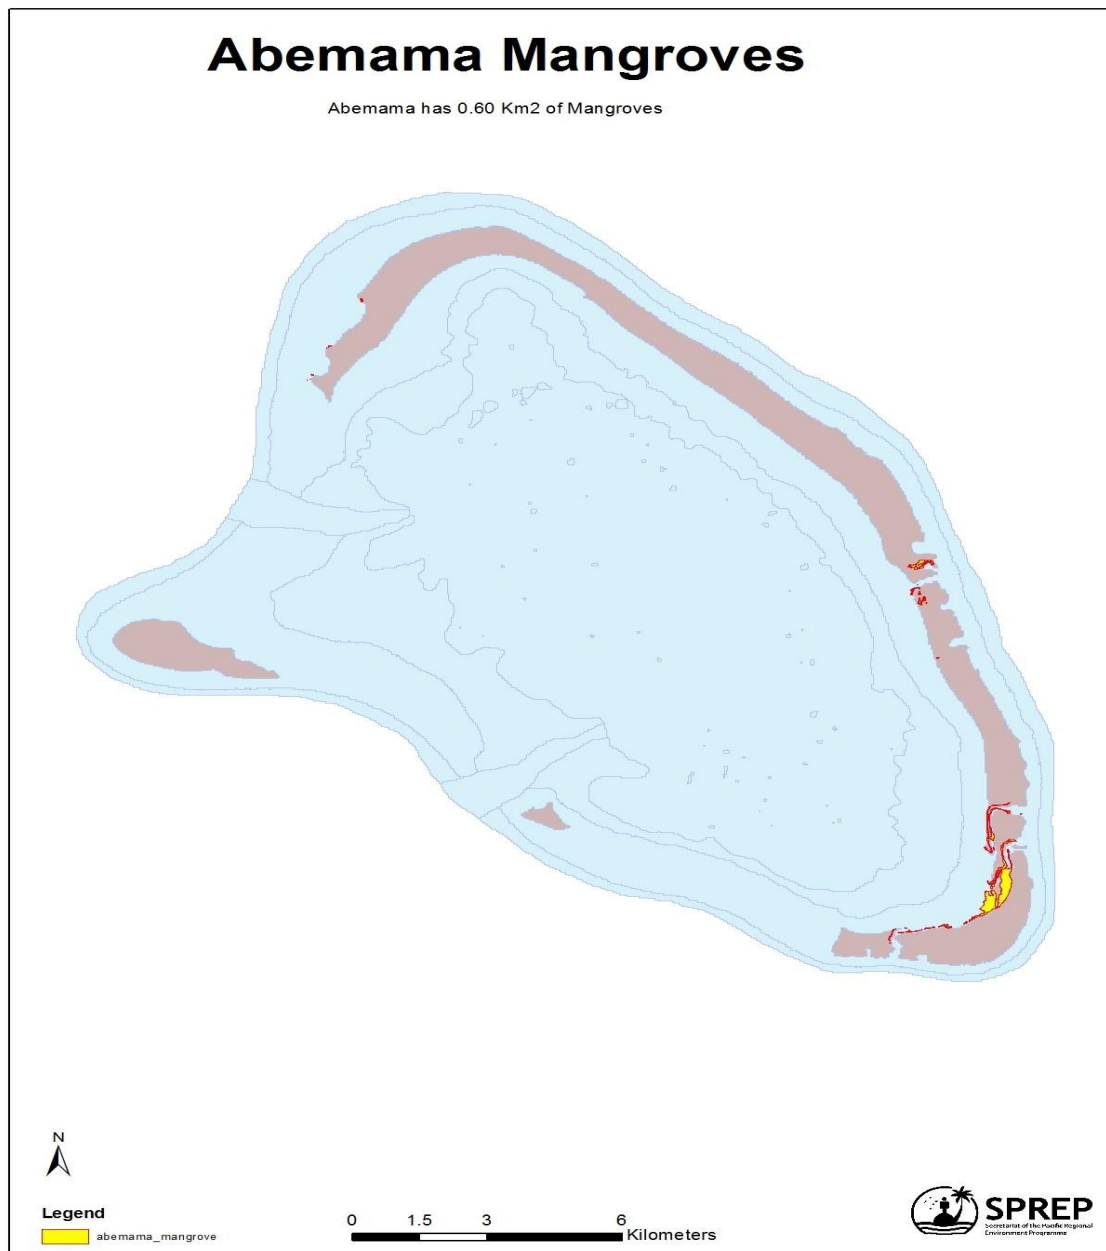

The by-laws and principles that are set herein this document belongs to the people of Baretoa Village, and effective utilization and guidance to give true meaning to its purpose rests solely with the elders or Unimwane, all responsible chairmen and as well as the people of Baretoa as a whole. As an obligation, outsiders (referring to as “people from other villages apart from Baretoa” and “foreigners”) will be inclined to exercise the purpose for which these bylaws are established and thus, appreciate the sense of ownership in the efforts to finally pave way as an example for other islands in the Republic of Kiribati to be guided by as well.

THE USE AND IMPLEMENTATION OF THE MANAGEMENT PLAN

The use and implementation of this Management Plan is applicable only within the boundary of Baretoa village on abemama. Baretoa is now known as the place where mangrove and other marine resources were protected as reflected in the local constitution which give legal support of the Management Plan. This Management Plan will supports also the Island council in addressing environmental issues that could affect the people of Baretoa and the whole island. The Management Plan also help in preparing the villagers and the people of the island to prevent and minimize issues that are caused from Climate Change.

The implementation of this Management Plan and its provisions is supported by the village constitution which was developed alongside the Management Plan by the villagers with the guidance of MWYSSA, after the village has agreed to develop such constitution for enhancing the implementation of the Management Plan. Copy of the village constitution was attached in Annex 1. Publicizing the contents of the Constitution was left within the hand of the village executive body through the support from the whole village plus the Island clerk and Mayor. The Environment and Conservation Division will also give support to Baretoa and assist in publicizing the village Management Plan and Constitution to other concerned government sectors/ministries to support the full implementation of this Management Plan and Constitution.

FIGURE 2: MAP OF MANGROVE COVERAGE IN ABEMAMA

The above map shows the mangrove coverage on Abemama. Mangrove demarcation was done in 2013 under KAPII by LMD and ECD. Because there is no recent mangrove demarcation take place on the island, it was difficult to see the changes in mangrove cover of either it increase or decrease.

MONITORING OF MANGROVES IN ABEMAMA (2013-2017)

The Mangrove plant can survive on land and at the sea, but in Kiribati, the mangrove plants are usually seen at the coastal area. Abemama is one of the Kiribati islands where two species of mangrove found on it, which are White mangrove and Red Mangrove. There are mangroves replantation activities conducted by various villages on the island (shown in the table below) through the support from the Environment and Conservation Division under the KAP II & KAP III project. The information on mangrove replanting activities in various areas on Abemama is fully emphasized in the table below. It is believed by Abemama islanders and the Environment and Conservation Division that most mangroves are survive closed to Tekatia’s bridge. Also, there are few mangroves that are found survived at the coastal areas of different villages. The table below record the number of mangrove seedlings that had been planted mangroves by the local people and ECD staffs, including also mangrove planting record with ISME team (International Society of Mangrove Ecosystem).
