Project Title: Building the Resilience of the Honey Sector to the Impacts Of Climate Change Through Genetic Security and Adoption of the Best Proven, Climate Smart Production Methods

Project Country: St Lucia

Responsible Organization: Department of Agriculture, Fisheries, Physical Planning, Natural Resources and Cooperatives

Proposed Budget (USD):
- JCCCP Grant Funding: $45,859.26
- In Kind Contributions: $87,094.26
- Total Budget: $132,953.52

Project Objective

The overall objective is to build a resilient apiculture industry in order to adapt and mitigate to the impacts of climate change.

Selected Focal Areas

This project will incorporate the following focal area identified under Outcome 2 of J-CCCP:

- Sustainable Agriculture

Targeted Stakeholder Groups

- Beekeeping Industry
**Project Activities**

- Strengthening habitat restoration, forestation and reforestation of flowering plants, fruit trees and endemic species to restore and protect the habitat and make more food available for bees.
- Promoting the establishment of rain water harvesting facilities at all apiaries to ensure the availability of water for bees.
- Improving the breeding stock of the bee for local and regional beekeepers.
- Building beekeepers capacity for the application of climate smart practices in the apiculture industry.
