Nonouti Island Community-Based Tourism development progressing

The Tourism Authority of Kiribati (TAK) in collaboration with the Business Promotion Unit of the Ministry of Tourism, Commerce, Industry and Cooperatives (MTCIC) continued its community-based tourism program on Nonouti Island from 14 – 31 October 2022.

Through this mission, the team worked with participating communities to develop their community-based tourism business plans. This included consultation with participating communities on business name ideas, package and pricing and other necessary information required for the business plan completion. “This is a great initiative, now we feel recognised and will operate like normal businesses” (Ammweri Tanentoa, Rotimwa village).

A total of 4 island communities and one fly fishing operator participated in the exercise and they included Autukia village, Rootin Abamakoro and CM Umwantwenei, Rotimwa village and the fly fishing-guides.

The business plan development will assist these 4 communities including the fly-fishing operator to understand the basics of business and revenue management skills to help sustain their business. Sustainability will be core to Nonouti island’s community-based tourism businesses with economic prosperity, cultural preservation, and environmental protection as their guiding pillars.

The 2 programmes also included product trial, development of product sign boards and a lobster cooking competition to boost community capacity to provide authentic culinary experiences for tourists.

The mission concluded with the cultural trade fair and the world food day celebration as a wrap of the LDCF1 Project featuring winners as the lobster cookery champion, best fishing guides and food security award.

The Nonouti community-based tourism business plans of participating communities will be endorsed during the launch and familiarisation trip in November 2022.

The trip was supported by the Food Security Project, commonly known as the LDCF-1 which is funded by the Global Environment Facility (GEF) through UNDP and managed by the Environment and Conservation Division (ECD) under the MELAD.
