

Sierra Leone

Sierra Leone Action plans for 2015 for follow up on advancing PPPs on Climate information and Early Warning Systems

① Capacity building:

- Training of Masters Candidates in Applied Meteorology with Climate and Managements.
- Training of Meteorological Technicians at various levels.

② Infrastructural Development:

- Installation of Automatic Weather Stations for point forecast for the Agricultural Sector using forecasting Model for issuing Warning
- Installation of AWS for Aerodrome forecast using forecasting model. (software for analysis and data).
- Reconstruction of Forecasting Studio for public weather forecast.
- Repairing of our Synergy System (TUMA Station)

③ Collaboration between line Ministry and Agencies

ie: Disaster Management Department, Environmental Protection Agency, Agricultural Sector, Civil Aviation, Maritime, Civil Society etc.

④ Partnership with Mobile Companies:

- Start Conversation (Round table discussion) regarding dissemination of early warnings to our end users.
- Networking of our available weather stations to have ~~centralized~~ our data in a centralised system.

⑤ Transformation into an Agency.
