

## MODULE 8.1: PROCESS INDICATORS

Empowered lives. Resilient nations.

Supported by:

Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety

based on a decision of the German Bundestag

## Overview

- What are process indicators
- How can process indicators be used?
- Method for assessing process indicators using scorecards
- Country examples

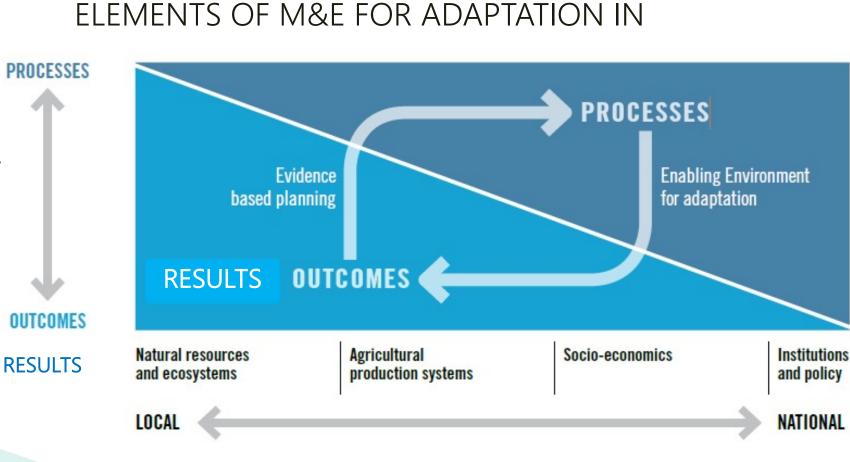

# Type of indicators I

 Process Indicators indicators measure progress in implementing adaptation policies, plans, projects or changes in institutional decision-making capacity, which create an enabling environment for adaptation.

AGRICULTURE

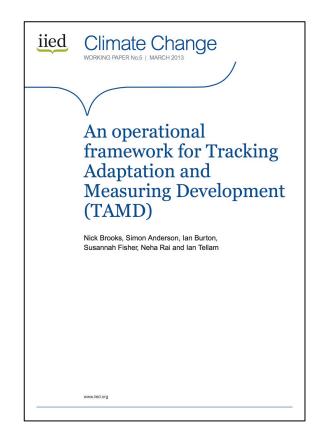

Results Indicators

are used to evaluate whether or not the activity, plan or policy achieved the intended objectives or results.

International Institute for Environment & Development (IIED) – *Tracking Adaptation and Measuring Development (TAMD) framework* 

- 1. Climate change mainstreaming/integration into planning
- 2. Institutional coordination for integration
- 3. Budgeting and finance
- 4. Institutional knowledge/capacity
- 5. Use of climate information
- 6. Planning under uncertainty
- 7. Participation (vertical and horizontal)
- 8. Awareness among stakeholders
- 9. Extent and quality of CRM measures

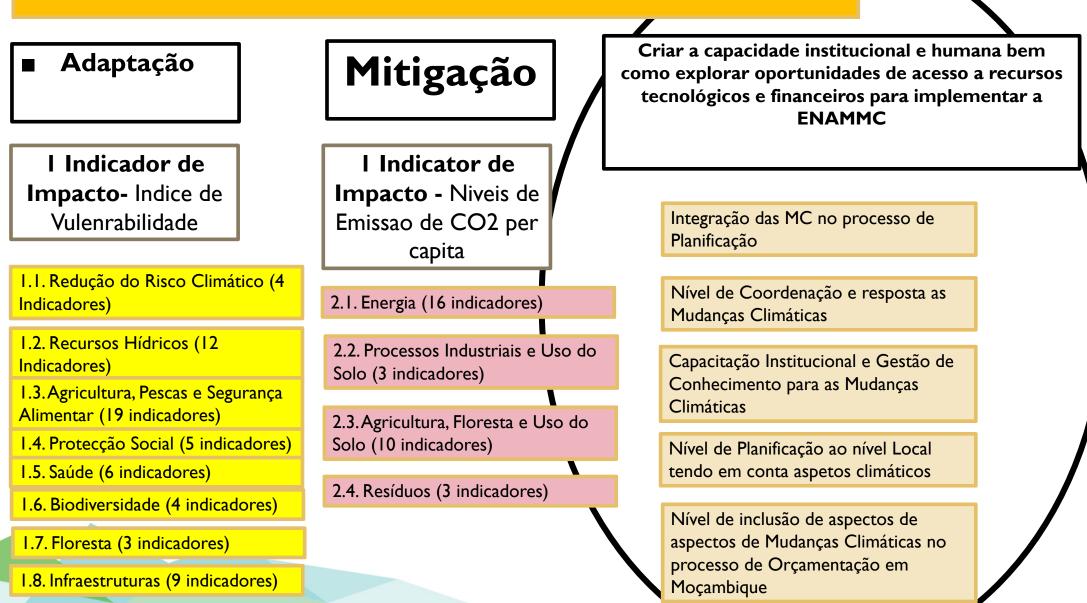

1-9 supported by methodological notes available for download at <u>http://www.iied.org/tracking-adaptation-</u> measuring-development

### **Example TAMD indicator**

| Indicator 1. Climate change integration into planning<br>Representation of strategies that address climate change in relevant planning<br>documents & processes   | No   | Partial  | Yes        |
|---|------|----------|------------|
| <ol> <li>Is there a climate change plan or strategy set out in a dedicated strategy<br/>document and/or embedded in the principal planning documents at the level<br/>being assessed (e.g. national, sector, ministry)?</li> </ol>  |      |          |            |
| 2. Is there a formal (e.g. legal) requirement for climate change (adaptation/<br>mitigation) to be integrated or mainstreamed into development planning (cf<br>requirement for EIA for certain activities/projects)?  |      |          |            |
| 3. Have specific measures to address climate change (adaptation/mitigation) been identified and funded?   |      |          |            |
| 4. Are climate-relevant initiatives routinely screened for climate risks?   |      |          |            |
| 5. Is there a formal climate safeguards system in place that integrates climate risk<br>screening, climate risk assessment (where required), climate risk reduction<br>measures (identification, prioritisation, implementation), evaluation and learning<br>into planning? |      |          |            |
| Score<br>(No. of "YES" answers x 2, plus no. of "PARTIAL" answers x 1)  | From | Brooks e | et al. 201 |

### **Process indicators within the SNMAMC**

### National Climate Change M&E Framework

### **Process indicators in results frameworks of climate funds**

Green Climate Fund (GCF)

Global Environment Facility (GEF)

UK International Climate Fund

Pilot Programme for Climate Resilience (PPCR)

- •5.0 Strengthened institutional and regulatory systems for climate responsive planning and development
- •6.0 Increased generation and use of climate information in decision making
- •7.0 Strengthened adaptive capacity and reduced exposure to climate risk•8.0 Awareness of climate threats and risk-reduction processes
- •Strengthen institutional and technical capacities for effective climate change adaptation outcome
- Integrate climate change adaptation into relevant policies, plans and associated processes environment
- Level of integration of climate change in national planning as a result of ICF funding
- Level of institutional knowledge of climate change issues as a result of ICF support
- Indicator 1: Degree of integration of climate change into national, including sector, planning
- Indicator 2: Evidence of strengthened government capacity and coordination mechanism to mainstream climate resilience

Process indicators can be used to report against the MPGs of ETF Adaptation information needs under ETF

A) National circumstances, institutional arrangements and legal frameworks

B) Impacts, risks and vulnerabilities

C) Adaptation priorities and barriers

D) Adaptation strategies, policies, plans, goals and actions to integrate adaptation into policies

E) Progress on implementation of adaptation

F) M&E of adaptation actions & processes

G) Info related to averting, minimising and addressing loss and damage

H) Cooperation, good practices, experience and lessons learned

I) Any other info related to impacts & adaptation

# HOW TO USE SCORECARDS

#### TRACK 1 indicators: National level – 5 Categorical Indicators

Indicator 1: Climate policy and strategies: Status of development of national CC policies, strategies and action plans.

Indicator 2: Climate Integration into planning: Inclusion of CC in long, medium (NSDP) & short term (PIP) planning.

Indicator 3: Coordination: Establishment and functionality of a national coordination mechanism.

Indicator 4: Climate information: Production, access & use.

Indicator 5: <u>Climate Integration into financing</u>.

TRACK 1 indicators - Approach

- A Ladder based approach The sub indicators comprise of ladder-based parameters that reflects how the country is moving towards achieving its institutional milestones.
- Use scorecards- each ladder is scored using 'Yes' (2) or 'No' (0)or 'Partial' (1). A weighted percentage is calculated.
- Narratives- Scores will be aggregated to yield an overall score. Narratives are also used to understand the reasoning behind the score.

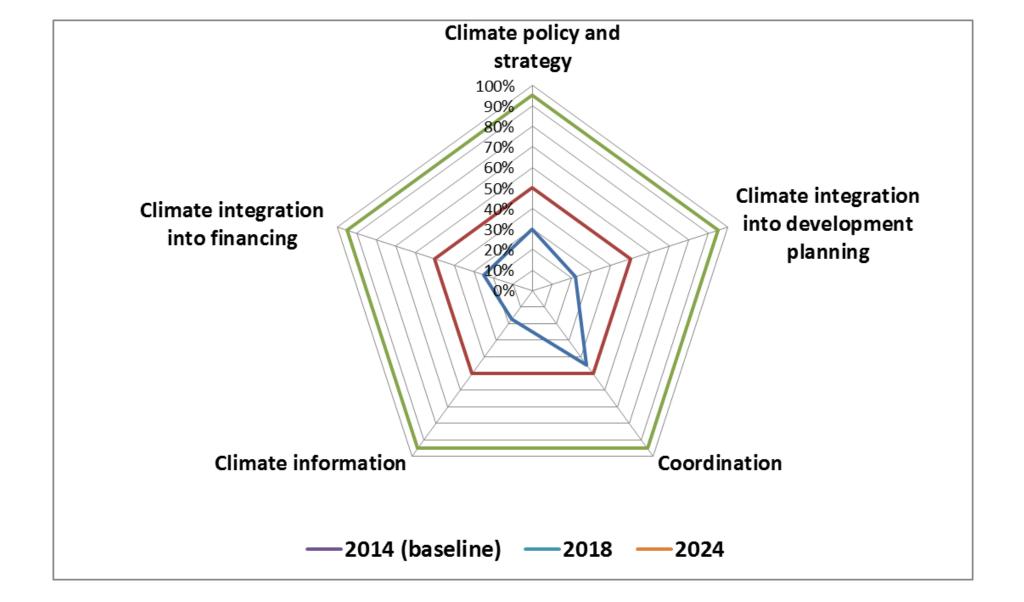

### Milestones & scoring example (Cambodia national CRM)

Indicator 1: Status of development of national policies, strategies and action plans for climate change response.

|      | Milestone   | Yes/No/<br>Partial | Supporting evidence/<br>narrative        |
|------|---|--------------------|--|
| 1    | NAPA exists but adaptation response limited to project based approaches.  | Yes                | Approved in 2006. 2 projects implemented |
| 2    | National CC strategic plan integrating adaptation, DRR & mitigation response is approved.                             | Yes                |  |
| 3    | Other national CC Action Plans in development (NAP, NAMA).  | Partial            | Initial steps.<br>Not fully scaled up.   |
| 4    | A National M&E framework for CC is under development.   | Partial            | In the design phase.                     |
| 5    | 9 sector CC action plans approved, more line agencies developing  | No                 | Ongoing.                                 |
| 6    | CC action plans updated based on evidence issued by M&E framework, new action plan prepared at end of planning cycle. | No                 | CC action plans are not implemented yet. |
| 7    | CCCSP progress monitoring reports are submitted to (to-be-identified) agency, in alignment with NSDP timeline.        | No                 | CCCSP not implemented yet                |
| 8    | Legislation that provides legal mandate for implementation of CC policy objectives is established.                    | No                 | In process                               |
| 9    | National CC strategic plan reviewed in 2018 based on evidence issued by the M&E framework.                            | No                 | Not yet                                  |
| 10   | New strategic plan approved at end of planning cycle in 2024.   | No                 | Not yet                                  |
| Tota | al score= (2Yes*2 + 2P*1)/10*2*1= 30%   |                    |  |

### TRACK 1 indicators- Outcomes of Scoring

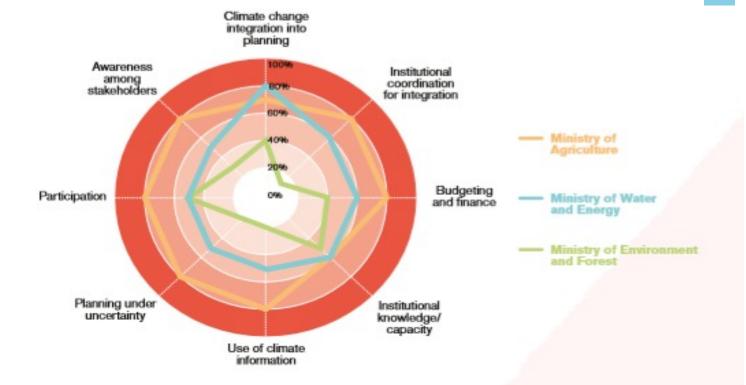

|   | Indicator  | 2014<br>baseline | Climate<br>policy<br>and<br>strategy   |
|---|--|------------------|--|
| 1 | Climate policy<br>and strategy                         | 30%              | 100%   |
| 2 | Climate<br>integration into<br>development<br>planning | 25%              | Climate<br>integrati<br>on into<br>financin<br>g<br>Climate<br>integrati<br>on into<br>develop<br>ment<br>planning |
| 3 | Coordination   | 45%              |  |
| 4 | Climate<br>information                                 | 17%              | Climate  |
| 5 | Climate<br>integration into<br>financing               | 25%              | on2014 (baseline)  |

# 2. Level of inclusion of climate change in long, medium (NSDP) and short term (PIP) national and sub-national planning documents.

|      |   |         | <b></b>   |
|------|---|---------|---|
| Step | Milestone   | Y/N/P   | Supporting evidence   |
| 1    | CC is mentioned in NSDP 2009-2013 but no specific measures on fund allocation   | Yes     |   |
| 2    | Response to CC is articulated in NSDP 2014-2018 and specific actions and indicators are included from CCCSP with related fund allocations   | Partial | It is articulated but NSDP not<br>yet approved but CCCSP<br>indicators are included in<br>NSDP. |
| 3    | Responsibility for CC integration in national M&E Framework is assigned within NIS/MoP.   | No      | There are preliminary discussions on it.  |
| 4    | Climate are integrated into the PIP.  | Partial | In the process. In consultation stage s   |
| 5    | Formal Procedures are in place in CDC for screening major donor and private sector investments against climate risk.  | No      | Some discussions.   |
| 6    | Subnational (commune and district) budgets and planning guidelines integrate climate change.  | No      | 1 pilot project in selected districts.  |
| 7    | At least one third of the most vulnerable provinces budget in their<br>Provincial Development Plans the climate change actions identified in<br>the sectoral Climate Change Action Plans (CCAP) |         | To be confirmed   |
| 8    | At least half of the most vulnerable provinces budget in their Provincial<br>Development Plans the climate change actions identified in the<br>sectoral CCAP.                                   | No      |   |
| 9    | Almost all of the most vulnerable provinces budget in their Provincial  | No      |   |

### Example: Results of national level process assessment in Ethiopia

|   |  | Score % for |                                 |  |  |
|---|--|-------------|---------------------------------|--|--|
|   | Indicator Mini<br>Agric                    |             | Ministry of Water<br>and Energy | Ministry of<br>Environment<br>and Forest |  |
| 1 | Climate change integration into planning   | 70          | 80                              | 40                                       |  |
| 2 | Institutional coordination for integration | 80          | 60                              | 10                                       |  |
| 3 | Budgeting and finance                      | 80          | 60                              | 40                                       |  |
| 4 | Institutional knowledge/capacity           | 60          | 60                              | 50                                       |  |
| 5 | Use of climate information                 | 80          | 50                              | 20                                       |  |
| 6 | Planning under uncertainty                 | 80          | 50                              | 20                                       |  |
| 7 | Participation                              | 80          | 50                              | 50                                       |  |
| 8 | Awareness among stakeholders               | 80          | 50                              | 30                                       |  |
